

IT Consulting Services

EXPERT INSIGHT FOR YOUR IT STRATEGY

As technology plays an increasingly important role in education, school leaders are faced with difficult questions: *Do we have a vision for technology? Do we know that we are preparing our students for the future?*

Get your questions answered.

VARtek's IT Consulting Services help you ensure that your vision and leadership translate to your school's IT environment.

How does it work?

VARtek's IT Consulting Services connect your school to the expert advice, planning, and insight needed to improve IT outcomes. From comprehensive audits to embedded technology leadership, VARtek provides a range of services designed to meet your school's unique needs.

“VARtek’s consulting services provided the District with value added advice in promoting our confidence in achieving the District’s technology goals. A comprehensive analysis of our IT environment against the industry standards provided a perspective for the District to consolidate everyone’s concepts into an informative and purposeful strategic plan concerning the success and sustainability of the 1:1 Technology Initiative while maintaining a superior level of IT support services.”

—Randall Harper, CPA Internal Auditor Dayton Public Schools, Administration Building

IT Audit

VARtek's IT Audit is an objective third-party assessment of your school's existing IT strategies and capabilities. Our audit will give you valuable insights and data that can help reshape your technology investment and improve IT operations. The comprehensive audit reviews your vision and strategy, financial IT investment, IT operations, infrastructure assets and technology integration.

Project Management

VARtek's professional project management processes ensure that your projects lead to healthy IT environments that support student learning. Our certified project managers follow a five-phase process rooted in industry best practices to manage all projects from the initiation and planning phases through closing. Our hands-on approach ensures that all stakeholders understand and agree to the scope, budget, timeline, and expected outcomes of a project before it starts.

Shared Services and your vCIO

VARtek has a multifaceted approach to providing IT services—we understand that schools don't always need full-time resources for such things as project management and engineering.

VARtek provides shared resources that can be deployed as needed for projects such as school startup, device rollouts, and upgrades. As your virtual Chief Information Officer (or vCIO), VARtek provides high-level guidance and expert support without the costs of hiring senior-level leadership. Through the vCIO service, VARtek provides mentorship and leadership training to help your IT leadership staff resolve any gaps in skills and training.

Engineering

VARtek will provide management of hardware, software, and labor resources to install and maintain your school's IT systems. Network management and 24/7 monitoring services are also available.

Engineering Certifications

- Microsoft Certified Systems Engineer (MCSE)
- Certified Novell Engineer (CNE)
- Certified Cisco Network Professional (CCNP)
