

"Districts need effective means to manage the technology with a budget. Our district had been experiencing great frustration with unreliable technology and had no staff with the proper knowledge to manage the technology system. VARtek was able to work with the staff to develop a plan to alleviate all of our technology issues."

Kimberlee Gray, Superintendent, Deer Park Community School District Cincinnati, Ohio

"Many schools are struggling with their technology needs and many school leaders are frustrated with the cost of technology just like I was and the little affect it had on student achievement. Before we started our relationship with VARtek we had many issues with our technology stemming from stability, reliability, funding, accountability, support, and integration. The solution that Three Rivers Schools implemented balanced these issues along with outstanding student results."

Dr. Rhonda Bohannon, Superintendent, Three Rivers Local Schools Cincinnati, Ohio

"Our teachers have integrated technology to an even greater extent since implementing the TMS. They have more confidence that their technology resources will be functional when they need them to be, and that when they are not, their issues will be resolved quickly."

Tom Barhorst, Assistant Principal/Director of Technology, Ursuline Academy Cincinnati, Ohio

"VARtek has been a good fit for our corporation. We are now able to deliver a standard and reliable technology experience to all our users every day."

Cheryl Vore, Director of Technology, Eastbrook Community Schools Marion, Indiana

"The feedback on our TMS has been overwhelmingly positive. Before, teachers were reluctant to plan a lesson around the computers because they were unreliable. Now everyone trusts that it will work. As a result, usage of our computer technology resources has increased dramatically, and we are working to integrate more technology into the curriculum. We would never have had the expertise or resources to accomplish this on our own."

Jerry Harshman, Superintendent, Eastbrook Community Schools Marion, Indiana

"Since our TMS solution was implemented, we have experienced a dramatic shift in attitude toward our technology. We have gone from a level of frustration to the point where, for the first time, we can think about using technology as a viable resource to meet our students' needs as well as the school's broader goals."

Dan Meixner, President, Chaminade-Julienne High School Dayton, Ohio

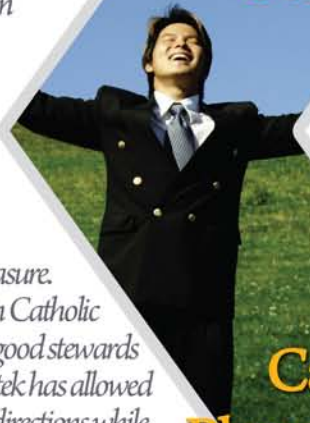

"Partnering with VARtek for our technology need has been a pleasure. The VARtek staff is professional, competent and very efficient. In Catholic education, our budgets are tight and it is imperative that we are good stewards of monies. Outsourcing some of our technology needs with VARtek has allowed us to utilize the talents of our in-house staff and resources in new directions while meeting the day-to-day needs of our faculty in a timely and cost effective manner."

Sharon L. Redmond, President, Ursuline Academy Cincinnati, Ohio
